Corrigendum-III

(dated 2nd January,2015)

Subject: Procurement of one GPU Server and one XEON-PHI Server and the corresponding compilers.

(Tender Notice No. TP/UC-PM-AS/SERVER/2014/57; dated: 24.11.2014)

On the basis of the recommendation of the Technical Bid Opening committee and approval from the competent authority in IACS the following corrigendum is being issued:

Sl. No.	In the Original Tender Notice	Revised Notice
01.		In the Benchmark submission and Evaluation sections (page no. 03): The Benchmark criterion (timing conditions pertaining to “benchmark.tgz”) for the XEON-PHI servers is relaxed. The new criterion reads: The vendors must at least submit the result of a pure CPU run on the proposed server which should match with the sample output file and demonstrate that the program compiles and runs correctly on the XEON-PHI cards.
